WHAT THIS IS ABOUT

This course provides guidance and training for field personnel such as maintenance crews, survey crews and utility crews in the planning, selection, application, and operation of short-term work zones. The course material is developed around typical short-term maintenance and utility activities. The training covers the applicable standards for work zone protection as contained in Part 6 of the Manual on Uniform Traffic Control Devices (MUTCD), discusses the need for proper application of devices, addresses liability issues of highway agencies and individuals, and offers practical exercises to plan, set up, operate, and remove work zone safety devices. The course also includes training on appropriate flagging procedures for these operations.

THE WORKSHOP COVERS:

- 📁 Guidance and Training for Field Personnel
- 📁 Operation of Short-Term Work Zones
- 📁 Applicable Standards for Work Zone Protection
- 📁 Proper Application of Devices
- 📁 Liability Issues
- 📁 Appropriate Flagging Procedures

OBJECTIVES

- ◆ Have a better understanding of the need for proper traffic control through work areas and for construction zone safety.
- ◆ Be familiar with current work zone standards and requirements as contained in Part 6 of the MUTCD.
- ◆ Have a fundamental knowledge of standard traffic control devices, their design, function, and application.
- ◆ Be able to design and install traffic control schemes for short-term operations on two-lane and multilane streets and highways.
- ◆ Understand proper flagging procedures.
- ◆ Be aware of liability issues involving highway agencies performing construction and maintenance operations, and understand guidelines for protecting work zone personnel and their departments in case of litigation.

WHO SHOULD ATTEND?

This course is best suited for state, county, city, and utility personnel who are responsible for establishing traffic controls through short-term utility and maintenance work areas.
